Claim 21, line 23, the phrase "the longitudinal length" has been changed to --a longitudinal length--.

The above changes were done to provide proper antecedent basis.

2. The following is an examiner's statement of reasons for allowance of claims 11-20: The prior art did not teach or suggest a fuel injection assembly as claimed by the applicant, specifically a fuel injection assembly comprising a second critical orifice disposed within a second nozzle passage, the second nozzle passage having a second nozzle inlet in communication with the first nozzle passage and a second nozzle outlet, the second nozzle passage having a converging portion adjacent the second nozzle inlet and a diverging portion adjacent the second nozzle outlet, the converging and diverging portions of the second nozzle passage separated by a second critical orifice; valve means for simultaneously controlling the first critical orifice and the inlet to the second nozzle passage, such that at least a portion of the fuel flow passing through the first critical orifice reaches at least sonic velocity as it travels

through the diverging portion of the first nozzle passage and exits the first nozzle passage, and such that at least a portion of fuel flow passes through the second critical orifice in the second nozzle passage and reaches at least sonic velocity as it travels through the diverging portion of the second nozzle passage and exits the second nozzle passage, together in combination with the other claimed features of applicant's invention.
